**Statement:**

We are at a time when there is tremendous pressure to bring changes to our community – some of which are not necessarily compatible with the community’s vision. I am not against change, but change must be managed for the benefit of the entire community. The LJ CPA is meant to be the community’s voice to the City. To that end we must insist that the City honor the land use laws, and we must raise our voices when they do not do so. We must insist that the La Jolla Community Plan and the PDO be upheld or changed according to a procedure that involves the community. Changes in these plans must not be pushed down on us from the top.

We must be sure our organization is open, and that our procedures and actions are above reproach.
