

## RELOCATE OPTION - LA JOLLA RESERVOIR

Option: Relocate to area fronting [7362 Brodiaea Way](#)

- Less impact on natural habitat.
- Closer access from street for City construction.
- Higher elevation for increased pressure.
- Reduces viewshed impacts from above and below.
- Potential to lower hillside fronting home to improve homeowner views.
- Access to viewpoint fronting reservoir provides public buffer for homes
- Creates Fire buffer for residences.
- Excavated soil could be placed on existing water tank pad and benches/graded to restore the natural grade.
- Retains natural topography and native vegetation in park's main view corridor, and from the Al Bahr access trail and surrounding neighborhoods.
- Reduces impacts to Park access during construction from the Al Bahr and Mecca Street trails.
- Minimizes slope construction and potential increased erosion and runoff due to grade changes.
