We live in North Pacific Beach & have owned a property there for over 20 years. Although we have close access to the Pacific beach & La Jolla Beach but prefer to go to The Windansea beach to enjoy the natural, unspoiled look & the feel of the beach there. Windansea Beach is known for its Natural, unchanged state. Sadly in the name of progress our beaches are modified from their original, beautiful natural form into something that fits within the frame work of social progress. The proposed construction of Gazebo on the Windansea does not add Beauty , usefulness or practicality of use to the beach but will do completely the opposite. It will Distracting from the BEAUTIFUL Natural Look of the beach, add unnecessary budget demand for its maintenance, attracts the undesired element of dwelling usage by those less unfortunate amongst us. Please preserve the natural beauty of this, thus far unspoiled beach, for the future generation to enjoy. Perhaps they can visit the World famous Windansea Beach in the futures and try to visualize what the beautiful unspoiled beaches around La Jolla coast line once looked like. Please utilize the funds, if you must, to Repair, Maintain, Enhance other sadly defaced & neglected beaches on our coast lines. God knows they & the visiting public to our beaches need & deserve it. This Email is intended for the Public Record in support of opposition to construction of Gazebo on the Windansea Beach.
