

BIOGRAPHICAL INTRODUCTION

Brian Williams

Thank you for the opportunity to introduce myself and tell you about my interests and ability to fill the open position in the La Jolla Community Planning Association. I am a home grown La Jollan having moved here at the age of four, attending La Jolla Elementary School and then The Bishop's School. I attended Occidental College in Los Angeles and lived in Santa Clarita for thirty years until the opportunity to return to La Jolla presented itself and my dream job of returning to work at The Bishop's School. The timing could not have been better as helping support my parents, returning home and marrying my beautiful wife in this great Village all fell together. Since 2014 I have been the Director of Facilities at the Bishops School, a job I held at the Westridge School for Girls in Pasadena, California for over twenty years. I attend St. James by the Sea and between my work at Bishop's and my family and faith, I also have the keen interest to help make this great place even better.

One of the primary functions of my job is to participate in Master Planning for the school campus. This involves working with School Administrators, architects, City Staff, City Planning Commissions and City Councils. I have presented plans for approval, managed feedback from Councils, Agencies and my own Community. I have found that I have a great talent for collaborating with people, understanding architectural plans, researching and understanding City codes and most notably, providing my own independent opinion on projects. La Jolla is at a unique place in its wonderful history and having experienced individuals who can tie together the smallest projects to a larger community plan is something I feel very capable of doing.

I have attended meetings of the Traffic and Transportation Committee, Department of Permit Review and the Community Planning Association as well as Enhance La Jolla and the La Jolla Town Council. The role these agencies play in making La Jolla a strong community are well established, however, I do see the time has presented itself for a new group of locals to step in and continue to help guide the work that takes place here. I feel I am qualified for this task and hope that I can earn your respect and trust and your support to participate on the important work that this Commission does. Thank your time.

Respectfully submitted,

Brian Williams
